For Immediate Release

Leading Analyst Firm Positions Catalyst as a ‘Visionary’ in Magic Quadrant for E-Discovery

Evaluation Based on Catalyst's Completeness of Vision and Ability to Execute

DENVER—June 9, 2011—A new report by the leading IT research and advisory company Gartner Inc. positions Catalyst Repository Systems as a “visionary” among providers of e-discovery software.

In its 2011 Magic Quadrant for E-Discovery Software, Gartner positions Catalyst as a visionary e-discovery company. Catalyst was a pioneer in providing cloud delivery of its e-discovery review and analysis platform and in providing end-to-end automation of data loading, culling and searching.

Gartner cited automation as a key goal e-discovery companies should strive for in their products. Catalyst’s system is automated from processing through production. This makes it easier for clients to meet tight deadlines, with fewer mistakes and at lower overall costs.

Gartner also believes that the future of the e-discovery market is in the cloud, with applications delivered as Software as a Service (SaaS). Catalyst software is delivered as a secure, hosted service. That means our clients can be up and running quickly and get additional capacity whenever they need it, without any appliances to purchase or maintain.

Other ways in which Catalyst software has set the pace among e-discovery companies include:

- Search technology that is among the fastest and most powerful in the industry.

- Multi-language capabilities that are unrivaled, including search in more than 70 languages and multi-language processing that handles both Unicode and non-Unicode documents.

- Our grid-based system is highly scalable, so that even if you have millions of documents to manage, our platform won’t slow you down.

“We consider Gartner’s positioning of Catalyst in the ‘visionaries’ quadrant confirmation of our mission to provide powerful search, a high degree of automation, full user control and broad scalability, delivered via the cloud,” said John Tredennick, Catalyst’s founder and CEO. “We agree with Gartner’s assumption that software as
a service will become the predominant form of e-discovery technology and we continue to innovate to provide our clients with more power and greater control.”

**About the Gartner Magic Quadrant**

The Magic Quadrant is copyrighted 2011 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

**About Catalyst**

Catalyst provides secure, scalable multi-lingual document repositories for electronic discovery, litigation support, and other complex regulatory matters. For over a decade, corporations and their counsel have relied on Catalyst to control litigation costs and make review teams more effective. Our systems and supporting services cover the heart of the litigation lifecycle—from processing and search, to analytics, review, production and trial.
